

Statement read to the Jurors issued by South Central Ambulance Service (SCAS) regarding Low Traffic Neighbourhoods.

*Ambulances can claim exemptions from road traffic regulations when responding to emergency calls and therefore can utilise bus lanes and other appropriate routes the public cannot in high traffic areas.*

*With regards to the video footage on Facebook, there was no impact on our ability to deliver care to the patient concerned.*

*SCAS is very supportive of these schemes to ensure we reduce carbon emissions and promote the public's health and wellbeing, and our Oxfordshire operational management team has been liaising closely with colleagues from Oxfordshire County Council throughout and in the run-up to the introduction of the new LTN around Divinity Road, St Clements and St Marys.*

*Our mapping software has been adjusted to reflect the new LTN scheme and contingencies are in place with the Council to facilitate the access of emergency vehicles through the existing scheme if there were a large scale or complex incident.*
